Prepared By (Communications Unit): Mike Brumfield / W5MMB / CC COML (Update: 3/1/22)				Incident Location:			
				County / State: Clatsop County / Oregon			

The convention in amateur radio calls for frequency lists to show three digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25). All channels are shown as if programmed in a portable or mobile radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
